Professional Summary — AI/ML engineer and founder who ships. B.Tech in AI & ML with **90+ open-source** in applied deep learning, computer vision, and LLM/agent tooling. Founder of **ROLLNO31 (Y Combinator S26, Top 10)** – an AI platform that turns verified academic records into automated, personalized opportunity matching. Owns problems end to end – data, modeling, backend, product – and pairs **advanced prompt engineering** with AI-assisted development to ship at high velocity. Open to relocation.

Experience

ROLLNO31 – Founder & CEO (Y Combinator S26, Top 10)

2024 – Present

AI EdTech platform for verified academic records & opportunity matching

Remote / Kakinada, India

- Built an AI system that ingests verified student records (marks, attendance, eligibility) and auto-matches each student to relevant opportunities – placements, exams, deadlines – with per-student, per-profile explanations of why they do or don't qualify
- Designed the pipeline that turns a single teacher broadcast into individualized, actioned outputs at classroom scale – auto-filled application forms from the verified record, staged reminders, and stakeholder dashboards
- Selected into **Y Combinator S26** and ranked in the **Top 10 of the batch**; owned product, ML, and engineering direction end to end

Full-Stack Product Builder – Independent / Client Work

2023 – Present

Freelance AI & web engineering

Kakinada, India

- Delivered **50+ client and personal products** across AI, computer vision, and full-stack web – from data collection through deployment – and maintain **90+ public open-source repositories** on GitHub

AWS & Cloud Intern – Internship Studio

Jul – Aug 2024

- Built and deployed applications on AWS across core cloud, storage, and deployment services

AI/ML & Cybersecurity Intern – APSSDC & Edunet Foundation (IBM SkillsBuild)

May – Jun 2024

- Completed applied AI/ML and cybersecurity training via IBM SkillsBuild; built model-based mini-projects on real datasets

Projects

lanforge-mcp

🌐 GitHub | Python, MCP, LLM Tooling

- Built and open-sourced an **MCP server exposing 6 tools** that let an LLM drive LANforge network-test automation, with **88% test coverage** and a mock mode for CI-friendly runs without hardware
- After open-sourcing and tagging the vendor, **Candela Technologies' CTO reached out within 24 hours** with an inbound engineering opportunity – the project directly generated recruiting interest

Glaucoma Detection

🌐 GitHub | Deep Learning, Segmentation, OpenCV

- Retinal fundus pipeline with interactive optic-disc cropping and a segmentation model that outputs a predicted mask and grades severity (e.g., moderate glaucoma)

AI-Powered Rebar Detection

🌐 GitHub | Computer Vision, Object Detection

- Detection model that automatically counts and localizes reinforcement bars from construction imagery for quality inspection workflows

Technical Skills

Languages Python, JavaScript / TypeScript, SQL, Java, C

ML & AI PyTorch, TensorFlow, scikit-learn, OpenCV, Deep Learning, Computer Vision

LLM & AI Tooling Prompt Engineering, LLM Application Development, RAG Pipelines, Agentic Workflows, MCP Servers, AI-Assisted Development

Data & Backend Pandas, NumPy, REST APIs, Node.js, FastAPI, PostgreSQL

Cloud & Tools AWS, Docker, Git / GitHub, Linux, CI & Automated Testing, React

Education

B.Tech, AI/ML – CGPA: 7.7/10

AI Diploma, Applied Artificial Intelligence – 73%

Aditya University, Surampalem, 2022 – 2026

SUNY / NEF (Washington, D.C.) & 360DigiTMG, Nov 2025
